

Example 1: Battery Life Claim

****Problem.**** A manufacturer claims the mean battery life is

10 hours. Past data show $\sigma = 1.2$ hours. A random sample of

36 batteries averages 9.6 hours. Test $H_0: \mu = 10$ vs $H_1: \mu \neq$

10 at $\alpha = 0.05$.

****Solution.****

1. $H_0: \mu = 10, H_1: \mu \neq 10$.

1.
